Summary

Results driven Software Engineer with experience in full-stack development, backend APIs, and AI-powered systems. Skilled in building scalable applications using FastAPI, React, cloud platforms, and RAG based AI solutions.

Education

Georgia State University

Jan 2024 – Dec 2025

Master's in Computer Science (GPA:3.76/4.0)

Atlanta, GA

R.M.D Engineering College

Aug 2019 – Apr 2023

Bachelor of Science in Computer Science (GPA:9.1/10)

Chennai, TN

Work Experience

IBM

May 2025 – Aug 2025

AI Research Intern

Remote

- Designed and built an AI-powered Interview Trainer Agent using IBM Granite LLMs and Retrieval-Augmented Generation (RAG), improving interview readiness by 30%.
- Developed scalable REST APIs using FastAPI and Watsonx.ai runtime, delivering real time feedback with sub-second latency..
- Improved response relevance by 25% through prompt engineering and evaluation metric refinement.

Georgia State University

Jan 2024 – Dec 2025

Graduate Assistant (Software Engineering)

Atlanta, Georgia

- Supported Software Engineering courses by coordinating labs, grading projects, and evaluating sprint deliverables for 60+ students/semester.
- Mentored students in OOP, REST API design, software testing, and full-stack web development.
- Assisted faculty with rubric design, GitHub-based evaluations, and technical troubleshooting.

KPIT Technologies

May 2023 – Nov 2023

Software Intern

Bangalore, India

- Built and integrated RESTful APIs and microservices, reducing feature delivery timelines by 20%.
- Optimized backend logic and debugging workflows, reducing recurring defects by 15%.
- Automated builds and deployments using Git and Jenkins CI/CD, supporting weekly releases.

Projects

Rate My Professor

 [Project Link](#)

- Developed a scalable full-stack application using FastAPI, React, JWT authentication, restricted to verified university domains.
- Implemented dynamic filters and analytics to improve professor search accuracy and usability..
- Designed an admin console to support CSV-based data ingestion, review moderation, and flag-handling workflows, ensuring data quality and platform integrity.

Interview Trainer Agent

 [Project Link](#)

- Architected an AI-powered interview coaching platform using IBM Granite LLMs and Watsonx.ai runtime.
- Implemented RAG pipelines with MongoDB-backed retrieval to generate personalized interview Q&A sessions.
- Improved model response accuracy by 25% through prompt chaining, feedback loops, and iterative refinement.
- Deployed FastAPI endpoints to support scalable session handling and performance monitoring.

Technical skills

Programming Languages: Python, Java, JavaScript, C, SQL, HTML/CSS

Frameworks & Libraries: React, FastAPI, Node.js, Spring Boot, Bootstrap, .NET

Could & devOps: AWS, IBM Cloud, Docker, Jenkins, CI/CD Pipelines

Databases: MySQL, SQLite, MongoDB, PostgreSQL

Tools: Github, VS Code, Tableau, Power BI

Achievements

- Served as Program Chair for IEEE Student Chapter at Georgia State University, organizing technical events and student programs.
- Awarded Winner for innovative design and development of 'Fashion-Tech Web Solution' website.
